

Warm, editorial, *candid*. Built for IT, not for sales decks.

OpenIT is an open-source IT helpdesk that runs on Claude Code. This document is the source of truth for our visual language — palette, mark, typography, and the component patterns that make the product feel like ours.

VERSION1.0 · 2026-05

§01BRAND ESSENCE

We sound like an *engineer* wrote it. Because one did.

OpenIT is honest, direct, and a little dry. We don't talk about "AI transformation" — we talk about tickets, queues, scripts, and saving you time. The product is open source, so the brand should feel like a craftsperson's tool, not enterprise software.

PERSONALITY

Editorial, not corporate

Long, confident sentences. Real punctuation. We use em-dashes, not exclamation marks.

TONE

Warm, with a hard edge

Cream paper feel, terracotta accents. Black ink underneath. Soft on the eye, certain in opinion.

VOICE SAMPLES

"Claude Code is the operating system."

"Answer once. Claude handles the next one." · "If you can run it in a terminal, Claude can use it."

Logo & wordmark.

The mark is a serif **O** — Fraunces Italic, weight 400 — set in cream on ink. The full wordmark pairs Inter Black "Open" with Fraunces Italic "IT" in terracotta.

APP ICON · 1024 × 1024 · INK #1D1813

Used as macOS / Windows app icon, favicon, and avatar. The "O" is Fraunces Italic 400 with the optical italic, centered visually (not geometrically). Clear space = 12% of canvas on every side.

WORDMARK · "OPEN" INTER 800 + "IT" FRAUNCES ITALIC 500 TERRACOTTA

OpenIT

OpenIT

OpenIT

Always lowercase prefix "Open" + uppercase "IT" — never "Openit", never "OPENIT". Minimum legible size = 16px. Letterspacing -0.02em. Don't track wider.

ON INK · CREAM + SOFT TERRACOTTA

OpenIT

On dark surfaces, lift the "IT" to the lighter terracotta (#ED7F47) so it doesn't muddy.

LOCKUP WITH BADGE

OpenIT

● OPEN SOURCE · MACOS & WINDOWS

OpenIT

IT HELPDISK · ON CLAUDE CODE

Use the badge lockup for hero sections; the icon+wordmark lockup for nav, footer, app shell.

A warm, four-color system.

Cream is the page. Ink is the type. Terracotta is the only thing that calls out — used for emphasis, links, the second half of a phrase, and the dot in every status pill. Everything else is restraint.

SURFACE

Cream
Base background. Cards on dark surfaces. Sidebar.
HSL 40 33% 96%
HEX #F7F2E8
Token --cream

SURFACE · ALT

Cream Deep
Alternating sections, card backs, recessed surfaces.
HSL 38 28% 92%
HEX #ECE5D7
Token --cream-deep

TYPE · INK

Ink
Primary text. Buttons. Terminal. Dark sections.
HSL 30 14% 10%
HEX #1D1813
Token --ink

ACCENT

Terracotta
The only accent. Links, emphasis, the italic phrase, status dots.
HSL 14 62% 50%
HEX #CE6038
Token --terracotta

ACCENT · SOFT

Terracotta Soft
On-ink accent. Glow + hover variant.
HSL 18 80% 60%
HEX #ED7F47
Token --terracotta-soft

TYPE · MUTED

Muted Foreground
Captions, meta, mono-tags on light surfaces.
HSL 30 8% 38%
HEX #645E58
Token --muted-fg

BORDER

Border / Hairline
1px section dividers, card edges. Often used at /10 or /15 opacity.
HSL 30 15% 82%
HEX #D7CFC2
Token --border

DESTRUCTIVE

Destructive
Reserved. Only for true destructive actions — delete, revoke.
HSL 0 70% 45%
HEX #C42B2B
Token --destructive

Pairing rules

LIGHT SURFACE

Ink type on Cream / Cream Deep.
Terracotta only for the accent word + the dot in pills.

DARK SURFACE

Cream type on Ink.
Terracotta Soft for the accent (not the base terracotta).

NEVER

No green, no blue, no purple, no gradient ramps.
One accent. One.

Three faces. *Used carefully.*

Inter does almost everything — display, body, UI. Fraunces Italic is the editorial accent that lifts a single phrase per paragraph. JetBrains Mono is the typewriter that handles tags, meta, and code.

Inter Display

Inter · 800 · -0.025em · 0.92lh

Headlines, hero, section titles.
Set tight — letterspacing -0.025em, line-height 0.92.

Configure in Claude Code.

Fraunces Italic

Fraunces · italic · 500 · -0.02em

The editorial accent. One phrase per paragraph, ideally at the punchline. Never set whole sentences in it.

— *Not UI.*

Inter Body

Inter · 400 / 600 · 1.5lh

Paragraphs, descriptions. 17–20px on marketing, 14–15px in product.

Claude handles tickets, provisions access, and *learns how you work* — so you spend your day on the hard problems, not the queue.

JetBrains Mono — tag

JetBrains Mono · 500 · 0.14em · UPPERCASE

Section markers, meta, kbd, badges. Always uppercase. Always tracked +14%.

§01 · THE THESIS

FOR IT · DESKTOP APP

~/OPENIT/ACME · CLAUDE

JetBrains Mono — code

JetBrains Mono · 400 / 500 · 1.7lh · sentence-case

Code blocks, terminal output, file paths. Used in plain sentence-case (not uppercase).

```
$ claude code
→ Claude Code v2.1 ready
✓ 33 skills loaded
```

Type scale

ROLE	FAMILY	WEIGHT	SIZE	LINE HEIGHT	TRACKING
Hero / H1	Inter	800	72 – 92 px	0.92	-0.025em
Section / H2	Inter	800	48 – 64 px	0.95	-0.022em
Card / H3	Inter	700	24 – 32 px	1.1	-0.02em
Body large	Inter	400	20 – 22 px	1.45	0
Body	Inter	400	15 – 17 px	1.5	0
Caption	Inter	500	12 – 13 px	1.4	0
Mono tag	JetBrains Mono	500	10 – 11 px	1.4	0.14em · UPPER

ROLE	FAMILY	WEIGHT	SIZE	LINE HEIGHT	TRACKING
Editorial accent	Fraunces	500 italic	matches host	matches host	−0.02em

UI primitives.

Eight patterns carry 90% of the surface area. They share two traits: full-radius pills (999px), or rounded-18px cards. Nothing else.

01 · STATUS PILL

● OPEN SOURCE · MACOS & WINDOWS

● SELF-LEARNING IT

Border 1px hairline, monotag text, terracotta status dot with 4px halo. Always full-radius.

02 · BUTTONS

⬇ Download

🔗 View on GitHub

Primary = ink → terracotta hover. Ghost = transparent → ink hover. 14×22 padding, 15px text.

03 · SECTION MARKER

§02

NATIVE ACCESS

Numbered chapters, terracotta digit, 1px ink/15 rule fills the gap. Used to break the page into editorial sections.

04 · EDITORIAL BLOCKQUOTE

Claude Code is the operating system.

2px terracotta left border, 24px indent, Inter 800 at 32px. Used once per long-form section, max.

05 · CHAT BUBBLES

MARCUS · #IT-HELP

need access to the analytics dashboard please

OPENIT · JUST NOW

Granted — Looker viewer role added. Try refreshing.

14px rounded, ink/06 for user, terracotta for bot. Always with monotag handle line.

06 · TERMINAL CARD

●●●

~/OpenIT/acme \$

→ claude code · ready

→ 5 skills loaded

→ vault: ~/OpenIT/acme

Ink background, JetBrains Mono 13px, terracotta-soft for arrows, dim cream for prompts.

07 · KEY-VALUE GRID

CLI TOOLS	MCP SERVERS
brew install gh, aws, gcloud...	One-click install
SLACK	SCRIPTS
Local bot via Socket Mode	TS, Python, Bash

Hairline grid built with 1px ink-15 gaps. Each cell: terracotta mono-tag key, ink value.

08 · PULL LINE

Answer once. *Claude handles the next one.*

The signature pattern: a short statement in Inter 800, the punchline in Fraunces italic terracotta. Used everywhere.

Lucide-style. *2px stroke.*

We use **Lucide** as the system icon set — 24×24 canvas, 2px stroke, round caps and joins. No filled icons. No two-tone. Inline SVG, never icon fonts.

DOWNLOAD

GITHUB

CHAT

TERMINAL

VAULT

CONNECT

Default size 16–20px in body, 24–32px in cards, 14px inside buttons. Match the text color of the parent.

Generous. *On purpose.*

Marketing surfaces breathe — 80–120px vertical padding between sections, max content width ~1240px. Product surfaces tighten — 16–24px. Alternate cream and cream-deep sections to create rhythm. Never two cream-deep sections in a row.

BASE UNIT

4px

All spacing snaps to a 4px grid. Common stops: 8, 12, 16, 24, 32, 48, 64.

RADII

6 · 12 · 18 · 999. Pills and surfaces — nothing in between.

SHADOWS

Hairline, soft, atmospheric. We don't use mid-level Material shadows.

The non-negotiables.

DO

- Set headlines tight — letterspacing -0.025em, line-height 0.92.
- Use Fraunces italic for one phrase per paragraph, ideally the punchline.
- Pair "Open" Inter 800 with "IT" Fraunces italic 500 terracotta. Always.
- Keep terracotta to ~5–8% of the page surface. It's an accent, not a fill.
- Use full-radius pills (999px) for everything inline-status-like.
- Alternate cream and cream-deep sections to break up long pages.
- Use em-dashes — they're load-bearing in our voice.
- Inline SVG, 2px stroke, round caps. Lucide is the system.

DON'T

- Don't stretch the wordmark, recolor it, or set it in all-caps.
- Don't add a second accent color. No blue, no green, no purple.
- Don't use Fraunces for body or buttons — it's a one-phrase tool.
- Don't use exclamation marks or emoji in product or marketing copy.
- Don't use filled or two-tone icons, and never icon fonts.
- Don't use gradients. The brand is paper + ink, not glass.
- Don't say "AI" when you can say "Claude". Don't say "transformation" ever.
- Don't put two cream-deep sections in a row.

Where to find things.

Fonts

- Inter — Google Fonts (weights 400, 500, 600, 700, 800, 900)
- Fraunces — Google Fonts (italic 400, 500, 600)
- JetBrains Mono — Google Fonts (400, 500, 600)

CSS Tokens (Source)

All variables are defined in:

landing/src/styles/global.css

Logo Files

- src-tauri/icons/icon.png — app icon (1024)
- src-tauri/icons/ — full icon set (.ico, .icns, sizes)
- Wordmark = live HTML, no SVG file (yet) — render with the CSS pattern in §02.

PH Gallery

- images/ph/01-hero.png
- images/ph/02-self-learning.png
- images/ph/03-open-source.png
- All 1270×760, exported from the matching .html via export.mjs.
